

# EE741

## Modular, compact, inline flow meter for compressed air and gases

The EE741 inline flow meter is dedicated for accurate metering and monitoring of compressed air and technical gases in DN15 to DN50 pipes.

The thermal measuring principle and the well-proven E+E hot film sensor element lead to best long-term stability and fast response time.

Outstanding measuring accuracy, even in the lower measuring range is achieved by an application-specific multi-point factory adjustment performed at 7 bar (102 psi). This allows reliable leak detection and corresponding energy savings.

The construction of the EE741 is optimized for easy installation and maintenance.

The EE741 is user configurable and can be easily adapted to any measuring task. The setup can be set using either display and push buttons or the free product configuration software EE-PCS.

## **Typical applications**

- Compressed air consumption measurement
- Monitoring of technical gases O<sub>2</sub>, N<sub>2</sub>, Ar, CO<sub>2</sub> and other
- Nitrogen generators
- Leak detection

### **Features**

#### Transmitter

- » For each three pipe diameters
- » Installation and removal without disassembling the pipework facilitatesregular calibration
- » Application-specific adjustment under pressure for best accuracy

#### Sensor head and thermal flow sensor

- » Robust design in stainless steel
- » Very short response time
- » Wide measuring range
- » Long-term stable and accurate
- » Negligible pressure drop
- » Highly insensitive to contamination
- » No additional pressure and temperature compensation required

#### Display

- » Shows instantaneous values and overall consumption
- » Intuitive device setup with pushbuttons
- » Can be rotated in 90° increments

#### Output

- » User configurable via display or PC
- » 0-20 / 4-20 mA output
- » Two switch outputs
- » Pulse output
- » Modbus RTU
- » M-Bus

#### Measurands

- » Standard volume flow
- » Mass flow» Standard flow
- » Temperature
- » Integrated consumption meter (totalisator) for cost-effective consumption analysis without additional datalogger

- Gauge mounting block
- » Precise and reproducible positioning of the transmitter for best accuracy
   » Aluminum or stainless steel
- » Can be operated with sealing plug
- also without transmitter

#### Modular design \_

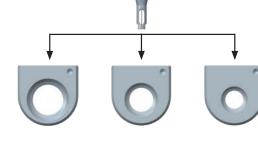

One and the same transmitter can be used for each of three pipe diameters:

 EE741:
 DN15 (1/2")
 /
 DN20 (3/4")
 /
 DN25 (1")

 EE741-N50:
 DN32 (1-1/4")
 /
 DN40 (1-1/2")
 /
 DN50 (2")

The pipe diameter is easily changed via the display menu or the Configurator software.

Once the gauge mounting block is built into the pipeline, the transmitter can be installed and removed without disassembling the pipework. As a result, the EE741 is also ideal for temporary measurement at serveral mounting blocks. The sealing plug included in the scope of supply enable the normal operation of the compressed air system when the transmitter is removed.

ELEKTRONIK

### **Display (optional)**

The state-of-the-art LCD shows the current measured values and the overall consumption. The user specific device setup can be easily performed with the push buttons and intuitive menu guidance.

The display can be rotated in 90° increments with a push button for convenient orientation in any mounting position of the flow meter.

The EE741 without display can be configured by the user via USB interface with the free EE-PCS product configuration software.

Sensor head / sensor element	Stainless steel 1.4404 / glass		
Gauge mounting block	Aluminium anodized or stainless steel 1.4404		
	IP65		

Factory setting of the output see manual.
 The tolerance specifications include the uncertainty of the factory calibration with a coverage factor k=2 (2 x standard deviation). The tolerance was calculated in accordance with EA-4/02 following the GUM (Guide to the Expression of Uncertainty in Measurement).
 The flow meter is factory adjusted at 7 bar (102 psi) (abs). At operating pressure other than 7 bar (102 psi) (abs), the error can be corrected by entering the actual system pressure via display menu or with EE-PCS configuration software.

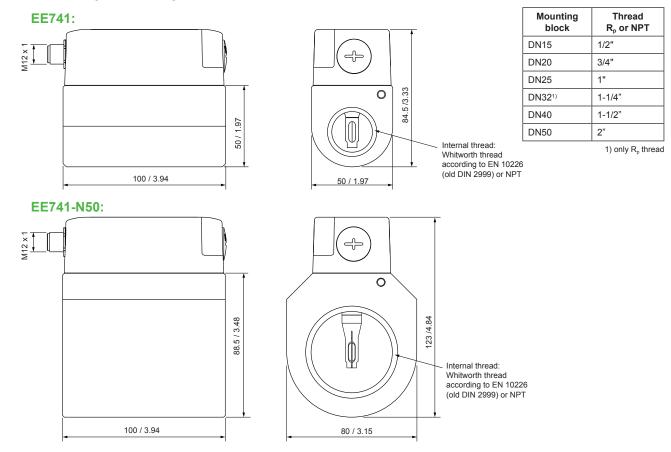

.....

## **Dimensions (mm/inch)**

## Modbus Map<sup>1)</sup>

The flow meter can be operated in a Modbus RTU network with max. 32 devices. Writing 0 into the corresponding register will reset the MIN/MAX values and the consumption meter. For Modbus protocol settings see Application Note Modbus AN0103 (www.epluse.com/EE741).

Register [DEC]	Protocol address [HEX]	Muasured value	Unit	Туре
30501	1F4	Temperature	°C	32-bit float
30503	1F6	Temperature	°F	32-bit float
30507	1FA	Standard flow	Nm/s	32-bit float
30509	1FC	Standard flow	SFPM	32-bit float

	DN25 (1")	HA081025	HA181025

The parts of the transmitter/mounting block in contact with the medium are oil and grease-free. Only for DN15, DN20 and DN25.
 Only for analogue/switch and pulse output
 Other gases upon request

## **Order Example**\_

### Item 1 - Transmitter

EE741-A6D2DN15
Pipe diameter/type
Output:
Display:
Pipe diameter (selectable):
Unit for process parameters:
Medium:

for DN15, DN20, DN25 Analogue/switch/pulse output With display DN15 (1/2") SI units [mbar, °C] Air

#### Item 2 - Gauge mounting block HA079015

Aluminum gauge mounting block DN15 (1/2")

## Accessories \_

- Inlet and outlet path BSP thread, stainless steel, for mounting block	DN15 (1/2")	HA070215
	DN20 (3/4")	HA070220
	DN25 (1")	HA070225
	DN32 (1-1/4")	HA070232
	DN40 (1-1/2")	HA070240
	DN50 (2")	HA070250

## Scope of supply \_

#### Item 1: EE741:

- EE741 according to ordering guide
- 1 x Allen key
- 1 x USB cable
- M12x1 straight socket, can be assembled
- Operating instructions
- Two self-adhesive labels for configuration changes (see user guide at www.epluse.com/relabeling)
- Inspection certificate according to DIN EN10204 3.1

#### Item 2: Gauge mounting block:

Gauge mounting block incl. sealing plug
